Allowable Subject Matter

Claims 1-2 are allowable.

The following is an examiner's statement of reasons for allowance:

The Bluetooth protocol is well known in the prior art as a standardized means for short range wireless communications including for uses directly relevant to the present invention which include use of Bluetooth for communication with an earset device, as well as for use in establishing a short-range hands-free link in a vehicle to increase user convenience and safety. It is also known in the prior art to use a vehicular audio system, including its loudspeakers, to supplement the function of such hands-free devices by allowing a user to hear incoming telephony or audio communications through said loudspeakers, and that a mechanical coupling may be used for power and/or data and signaling between a hands-free adapter and a vehicle audio system and these concepts are demonstrated in the prior art previously cited and also in the references made of record below. The novelty of the present invention is in the specific construction and connections laid out in the claim, and its function to automatically switch to a voice connection from a Bluetooth earset when, responsive to and only when the earset is plugged into the socket of the car audio apparatus, and likewise disconnects when removed; this disconnection causing the audio system of the car to function as a common car audio device. When incorporating all the limitations of the claim, none of the prior art teaches the features as claimed.

Claim 2 depends directly from allowable claim 1 and therefore incorporates all the limitation of its base claim. When incorporating all the limitations of the claim and the base claim, none of the prior art teaches the features as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kim (US 7,149,551) is cited as relevant to the art of hands free communications and particularly a Bluetooth headset which is activated upon a mechanical action from a user. Holmes is cited as a relevant prior art Bluetooth vehicle adapter.
